- Fast learner of new techniques

### About Me

Passionate about web development with full-stack skills, mastering HTML, CSS, JavaScript, NodeJS, MongoDB, ExpressJS, PHP, MySQL, MariaDB, Laravel, Git, and React. I have collaborated on various web application projects, tackling technical challenges as part of a team. My active participation in workshops and extracurricular activities not only expanded my skills but also enriched my professional network, driving my constant growth in this field.

### Education

#### Certificate of Professionalism in Web Technologies Development

Grupo Colon-IECM

10/2024-01/2025

- Course with practical training focused on web application development using the latest technologies.
- Gained practical competencies in client-side and server-side web programming, especially server-side using MySQL, PHP, and C#.
- Strengthened skills in implementing applications across diverse web environments.

#### Web Development Bootcamp

Ironhack Madrid

9/2023-12/2023

- Acquired full-stack web development skills with tools such as HTML, CSS, JavaScript, NodeJS, MongoDB, ExpressJS, Git, and React.
- Worked on various projects focused on web application creation.
- Collaborated in teams to solve technical challenges.
- Actively participated in workshops and extracurricular activities for professional development and networking.

#### Compulsory Secondary Education (ESO)

IES Palomeras Vallecas

8/2015-12/2020

### Projects

- **Ironjobs:** Frontend and backend development in a single-page application (React, Node.js, JavaScript, MongoDB, APIs).
- **MeetMatters:** Web Application based on a Server and Development with APIs (Google, Meet Museum, custom REST API with its database).
